What is the Trade Unionist and Socialist Coalition?

We are anti-cuts activists, community campaigners and working-class fighters.

TUSC was launched in 2010 by the late Bob Crow as a genuine alternative to all the main parties of austerity, the rich and big business.

TUSC is backed by the RMT nationally, as well as leading members of the FBU (fightfighters), PCS (public sector workers), POA (prison officers) and NUT (teachers) unions. It includes the Socialist Party, and other socialist groups. TUSC plans to stand 100 general election candidates and 1000 council candidates

"All the major parties have signed up to more years of misery for working people - more privatisation, more cuts, more destruction of the NHS and public services, more environmental degradation.

TUSC supported the campaign to defend the Accident and Emergency units in west London. We think that private companies have no place in the NHS and are bleeding the NHS of much needed resources. We call for no cuts or closures of NHS services. We stand for an end to private finance initiatives (PFI) and to take all PFI companies back into public ownership. The pay freeze for health workers must be ended together with low pay for NHS workers. We also call for the nationalisation of the drugs companies who are profiteering out of the NHS.

Big business has salted away £120 billion a year that should have been paid in taxes. If this money was used for schools, hospitals and other public services there would be no need for any cuts.

TUSC policies represent an alternative for the 99% who bear the brunt of austerity."

West London TUSC will be holding regular campaign stalls every Saturday.
